# Artificial intelligence in health: ethical and scientific challenges

Cycle of  
Conferences  
**Josep Egozcue**

## Date:

July 5, 2022

## Place:

**ATENEU BARCELONÈS**

**Assembly Hall**

Carrer de la Canuda, 6 - Barcelona

# Artificial intelligence in health: ethical and scientific challenges

## XIII Cycle of Conferences Josep Egozcue

The Josep Egozcue Conferences have established themselves as the annual meeting of the Víctor Grifols i Lucas Foundation with experts in bioethics to discuss a current issue. After the break to which COVID has forced us, this year we resume activity and put on the table the debate around Artificial Intelligence (AI) and its application on health.

The impact of AI on our society, and more specifically in the field of healthcare, is already a reality and it is good to stop to analyze, where appropriate, its effects on the person, beyond its obvious technological advantages. How does it affect the patient's autonomy? Are diagnostic algorithms safe? Do we put confidentiality at risk? Who assumes responsibility in front of possible errors?

It is a duty of bioethics to question these aspects and we want to do so from the expert voice of those who have been working on it many time ago and weigh pros and cons. As a society we must enter this debate!

July 5, 2022

---

9:00 h. **Registration**

9:30 h. **Welcome and presentation**

**Victoria Camps**, President of the Víctor Grifols i Lucas Foundation.

**Núria Terribas**, Executive Director of the Víctor Grifols i Lucas Foundation.

9:45 h. **Ethical challenges of AI: human-machine teaming in healthcare\***

**Mariarosaria Taddeo**, Associate Professor and Senior Research Fellow, ICSS DPhil Programme Director, Oxford Internet Institute, University of Oxford.

10:15 h. **Debate**

10:45 h. **Coffee Break**

11:15 h. **Artificial Intelligence and research in genetics\***

**Harry Farmer**, Researcher, Ada Lovelace Institute, London.

11:45 h. **Debate**

12:15 h. **AI applications in health in our country**

**Felip Miralles**, Director of the Digital Health Unit. EURECAT.

**Juliana Ribera**, Medical Consultant. Amalfi Analytics.

**Oriol Farrés**, Lecturer in the area of ethics and political philosophy, UAB.

*Moderator:* **Núria Terribas**, Executive Director of the Víctor Grifols i Lucas Foundation.

13:30 h. **Debate**

14:00 h. **Closing**

\*There will be simultaneous translation between English and Catalan.
